Book Synopsis

Follow along with the construction of an HO scale model railroad module based on the renowned Rockville Bridge over the Susquehanna River in Pennsylvania. Over 120+ pictures and diagrams show the complete process of building the module from design through scenery. See how the module was constructed in less than 90 days!

Ordering Information:

Copies of the book can be purchased at Amazon.com, The Rockville Bridge Website, or at select hobby shops and retailers.

Retailers and hobby shops interested in carrying the book should contact The Rockville Bridge for ordering information.

Author Biography:

Jim Spavins is an active builder of model railroad modules. He is a former columnist for the magazine *Model Railroad News* where he wrote about the Teen Association of Model Railroading (TAMR) for 3 years and has been published in *Model Railroader* magazine. Jim is also one of the founders of Modular Railroading (www.modularrailroading.com), a web resource for module builders.
